

USB 2.0 High-Speed (480 Mbps) and Audio Switches with Negative Signal Capability and 1.8-V Logic Compatibility

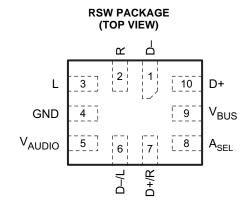

Check for Samples: TS5USBA224

FEATURES

- High-Speed USB Switch:
 - 4 Ω R_{DSON} Typical
 - 12.5 pF C_{ON} Typical
 - 650-MHz Bandwidth (-3 dB)
- Audio Switch:
 - 3 Ω R_{DSON} Typical
 - Negative Rail Capability
 - Low THD: <0.05%
 - Internal Shunt Resistors for Click-and-Pop Reduction
 - Powered From V_{AUDIO} (2.7V to 5.5V)
- 1.8-V Compatible Control Input (A_{SEL} and V_{BUS})
 Threshold
- I_{OFF} Supports Partial Powerdown Mode
- ESD Performance Tested Per JESD 22
 - 2000-V Human-Body Model (A114-B, Class II)
 - 1000-V Charged-Device Model (C101)
 - 200-V Machine Model (A115-A)

APPLICATIONS

- Cellular Phones
- Personal Digital Assistants (PDAs)
- Portable Instrumentation
- Digital Still Cameras
- Portable Navigation Devices

DESCRIPTION

The TS5USBA224 is a double-pole, double throw (DPDT) multiplexer that includes a low-distortion audio switch and a USB 2.0 High-Speed (480Mbps) switch in the same package. This configuration allows the system designer to use a common connector for audio and USB data. The audio switch is designed to allow audio signals to swing below ground which makes this common connector configuration possible.

The TS5USBA224 is powered up using V_{AUDIO} . When A_{SEL} =High, the audio path is selected regardless of the logic level at V_{BUS} . If A_{SEL} =Low and V_{BUS} =High, the USB path is selected. Otherwise if A_{SEL} =Low and V_{BUS} =Low, the audio path is selected.

The TS5USBA224 also features shunt resistors on the audio path to reduce clicks and pops that may be heard when the audio switches are selected.

ORDERING INFORMATION

T _A	PACKAGE ⁽¹⁾ (2)		ORDERABLE PART NUMBER	TOP-SIDE MARKING
-40°C to 85°C	QFN 0.4-MM PITCH – RSW (Pb-Free)	Tape and reel	TS5USBA224RSWR	A5R

(1) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

(2) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

SUMMARY OF TYPICAL CHARACTERISTICS

	USB PATH	AUDIO PATH
Number of switches	2	2
ON-state resistance (r _{on})	4 Ω	3 Ω
ON-state resistance match (Δr_{on})	< 0.3 Ω	< 0.3 Ω
ON-state resistance flatness (r _{on(flat)})	N/A	1.5 Ω
Turn-on/turn-off time (t _{ON} /t _{OFF})	< 2 µs	< 4 µs
Bandwidth (BW)	650 MHz	N/A
OFF isolation (O _{ISO})	–22 dB	-83 dB
Crosstalk (X _{TALK})	-31 dB	-83 dB
Total harmonic distortion (THD)	N/A	0.05%

PIN DESCRIPTION TABLE

	PIN		DESCRIPTION
NO.	NAME	TYPE	DESCRIPTION
1	D-	I/O	USB Data (Differential –)
2	R	I/O	Right Channel Audio
3	L	I/O	Left Channel Audio
4	GND	Ground	Ground
5	V_{AUDIO}	Power	Supply Voltage
6	D-/L	I/O	USB/Audio Common Connector
7	D+/R	I/O	USB/Audio Common Connector
8	A _{SEL}	Input	Control Input for Audio Path
9	V_{BUS}	Input	Control Input for USB Path
10	D+	I/O	USB Data (Differential +)

PARAMETER MEASUREMENT INFORMATION (Enable and Disable Times)

TEST	V _{AUDIO} (V _{DD})	S1	R_L	V _{in}	CL	$oldsymbol{V}_\Delta$
t _{PLZ} /t _{PZL}	3.3 V	2 · V _{DD}	200 Ω	GND	10 pF	0.3 V
t _{PHZ} /t _{PZH}	3.3 V	GND	200 Ω	V _{DD}	10 pF	0.3 V

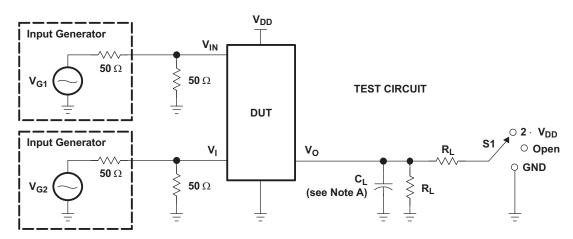

NOTES: A. C_L includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high, except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR \leq 10 MHz, $Z_0 = 50 \Omega$, $t_r \leq$ 2.5 ns. $t_f \leq$ 2.5 ns.
- D. The outputs are measured one at a time, with one transition per measurement.
- E. t_{PLZ} and t_{PHZ} are the same as t_{dis} or t_{OFF} .
- F. t_{PZL} and t_{PZH} are the same as t_{en} or t_{ON} .

PARAMETER MEASUREMENT INFORMATION

A. C_L includes probe and jig capacitance.

Figure 12. Test Circuit for Frequency Response (BW)

Frequency response is measured at the output of the ON channel. For example, when $V_{SEL}=0$ and A_0 is the input, the output is measured at $0B_1$. All unused analog I/O ports are left open.

HP8753ES Setup

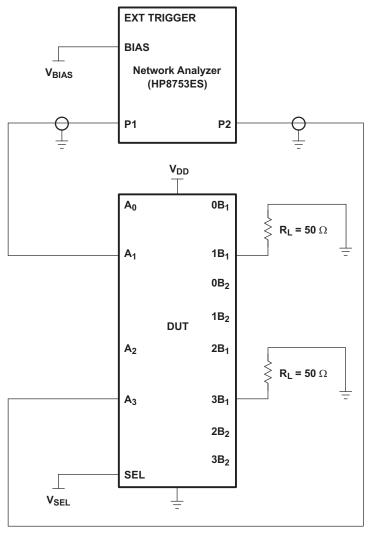

Average = 4 RBW = 3 kHz

 $V_{BIAS} = 0.35 \text{ V}$ ST = 2 s

P1 = 0 dBM

TEXAS INSTRUMENTS

PARAMETER MEASUREMENT INFORMATION (continued)

- A. C_L includes probe and jig capacitance.
- B. A $50-\Omega$ termination resistor is needed to match the loading of the network analyzer.

Figure 13. Test Circuit for Crosstalk (X_{TALK})

Crosstalk is measured at the output of the nonadjacent ON channel. For example, when $V_{SEL} = 0$ and A_1 is the input, the output is measured at A_3 . All unused analog input (A) ports are connected to GND, and output (B) ports are left open.

HP8753ES Setup

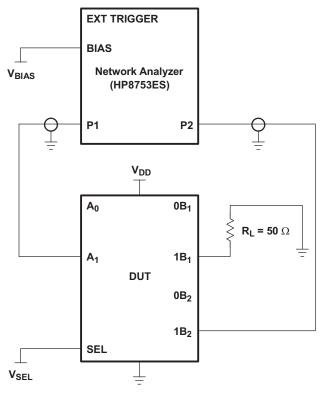

Average = 4 RBW = 3 kHz $V_{BIAS} = 0.35 V$

ST = 2 s

P1 = 0 dBM

PARAMETER MEASUREMENT INFORMATION (continued)

- A. C_L includes probe and jig capacitance.
- B. A 50-Ω termination resistor is needed to match the loading of the network analyzer.

Figure 14. Test Circuit for OFF Isolation (O_{ISO})

OFF isolation is measured at the output of the OFF channel. For example, when V_{SEL} = GND and A_1 is the input, the output is measured at $1B_2$. All unused analog input (A) ports are connected to ground, and output (B) ports are left open.

HP8753ES Setup

Average = 4

RBW = 3 kHz

 $V_{BIAS} = 0.35 V$

ST = 2 s

P1 = 0 dBM

PACKAGE OPTION ADDENDUM

PACKAGING INFORMATION

Orderable Device	Status	Package Type	Package Drawing	Pins	Package Qty	Eco Plan	Lead finish/ Ball material	MSL Peak Temp	Op Temp (°C)	Device Marking (4/5)	Samples
							(6)				
TS5USBA224RSWR	ACTIVE	UQFN	RSW	10	3000	RoHS & Green	NIPDAU NIPDAUAG	Level-1-260C-UNLIM	-40 to 85	(A5R, A5V)	Samples

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) RoHS: TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (CI) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

- (3) MSL, Peak Temp. The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.
- (4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.
- (5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.
- (6) Lead finish/Ball material Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

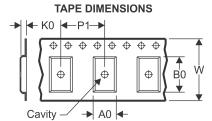

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PLASTIC QUAD FLATPACK - NO LEAD

NOTES:

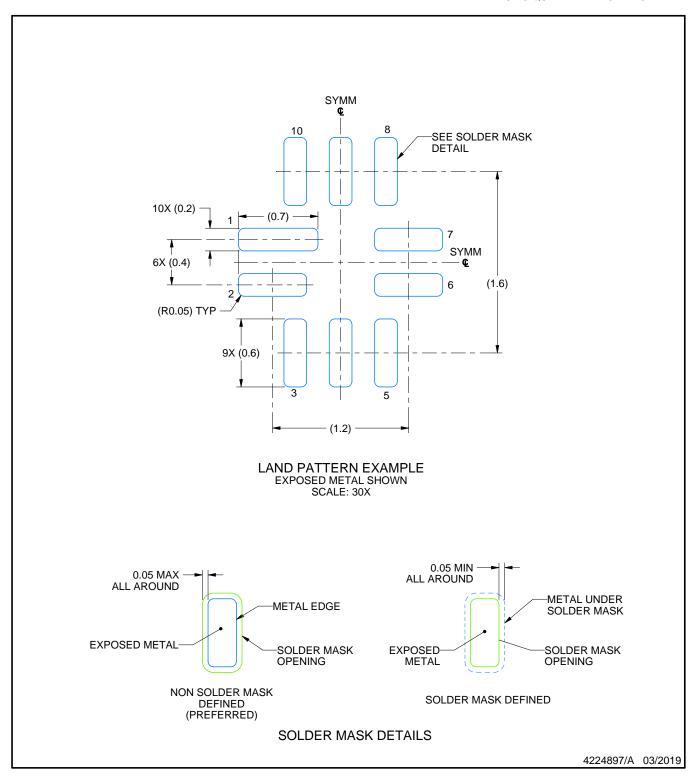

- 1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.

 2. This drawing is subject to change without notice.

 3. This package complies to JEDEC MO-288 variation UDEE, except minimum package height.

PLASTIC QUAD FLATPACK - NO LEAD

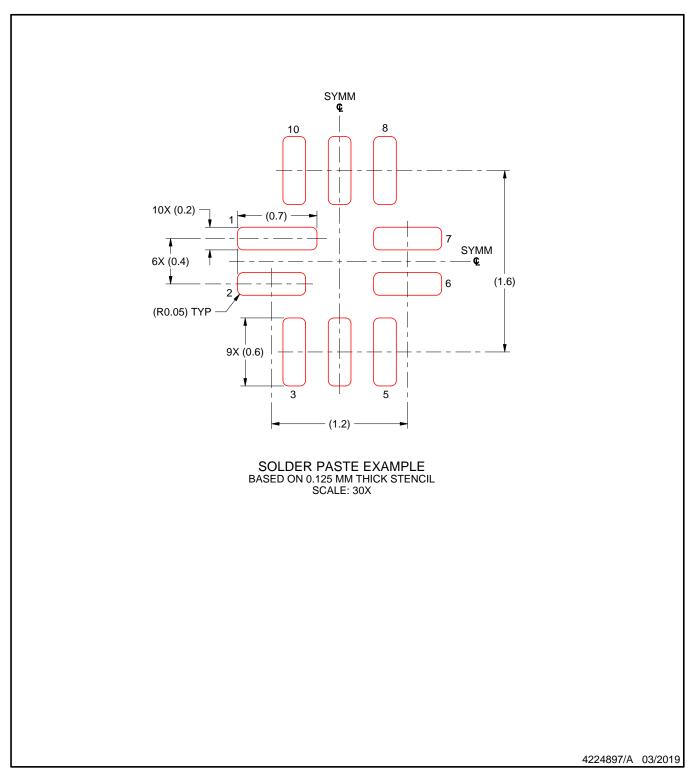

NOTES: (continued)

- 4. This package is designed to be soldered to a thermal pad on the board. For more information, see Texas Instruments literature number SLUA271 (www.ti.com/lit/slua271).
- 5. Vias are optional depending on application, refer to device data sheet. If any vias are implemented, refer to their locations shown on this view. It is recommended that vias under paste be filled, plugged or tented.

PLASTIC QUAD FLATPACK - NO LEAD

NOTES: (continued)

6. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
